beginning**

Baltic TechGewebe GmbH – your expert for insulation systems

Baltic TechGewebe GmbH offers a comprehensive choice of glass fabrics, insulation materials, fastenings, construction and assembly. Always in view of the future and its challenges.

Batts or moldings, individually made of innovative raw materials

The fields of application of our products are versatile and lasting ranging from plant construction, navigation to industry. The insulation systems of Baltic TechGewebe GmbH based in Kiel stand for a high-quality processing of various materials. We are your address for custom-made insulating batts and systems of glass fabrics and modern insulation mortars. In our workshop we produce unique single pieces as well as serial

productions according to your wishes and expectations.

From a special product for the German navy to an indispensable object in industrial planning

Our enterprise, which was set up in the year 2004, acts as a manufactory for efficient insulating systems. All our products are manufactured individually for every single customer.

The high quality of our custom-made products has proved its worth in other areas like plants and mechanical engineering, science, research and aerospace. Thus, we have many well-known companies as our customers today.

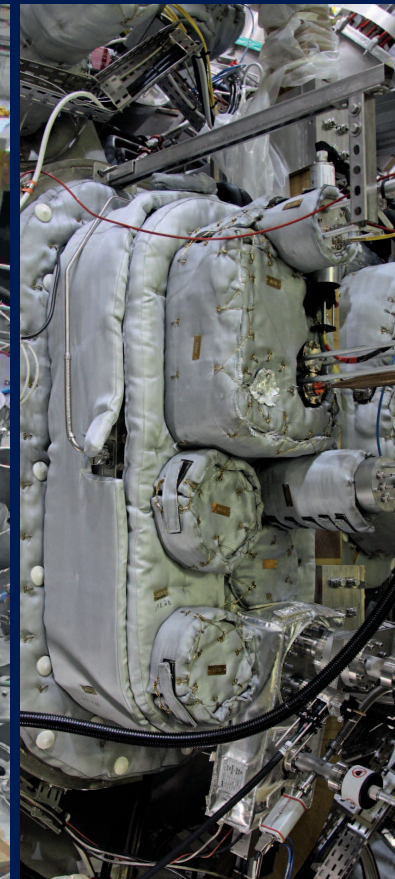

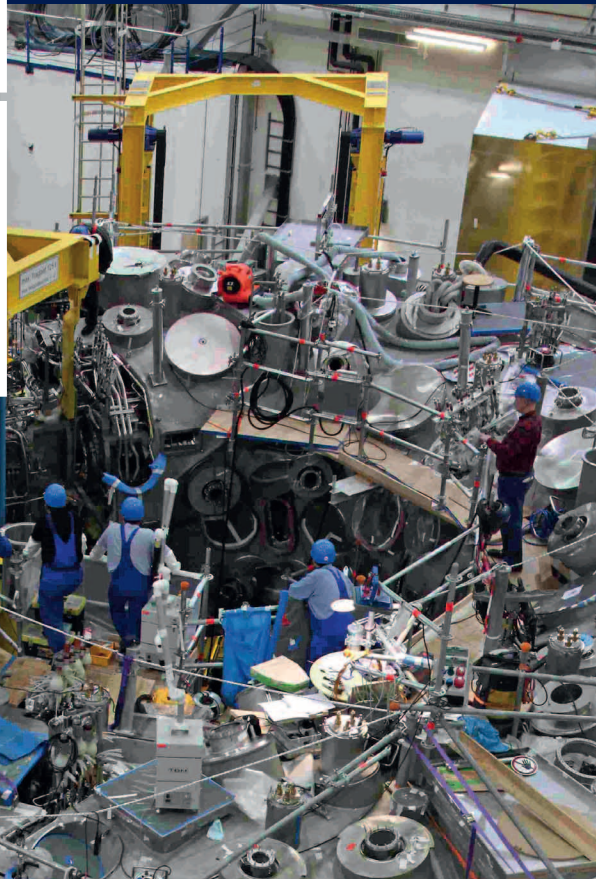

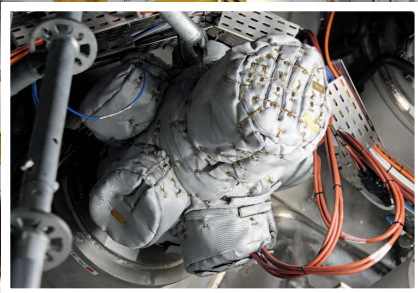

Our experience – your advantage

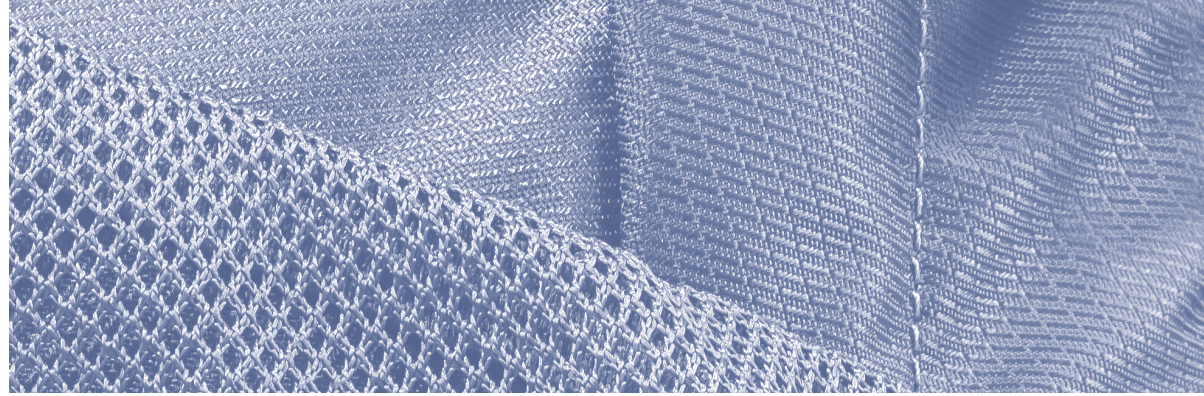

Our key services:

- Production of insulation batts
- Manufacture of fabrics
- Construction and assembly of insulating systems
- Splash guard curtains against humidity and hot liquids

Measuring connection on container
Wendelstein 7-X

With our help you are on the right track

- Curtains for protection against flying sparks
- Dividing curtains to separate dirty working spaces
- Individually manufactured tarpaulins (waterproof and protective covers)

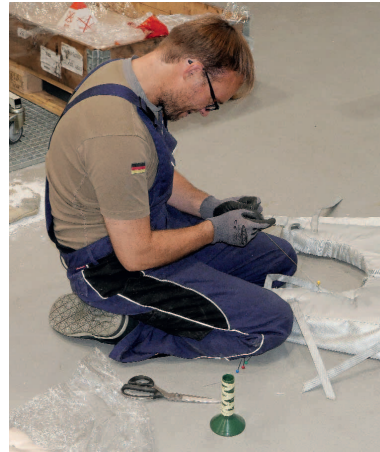

Our qualities

- Even insulating strength
- Size accuracy and sharp edges
- Individual markings are possible
- Component service
- Filling with different insulating materials (depending on specification)
- According to your wishes: Hooks, stitchings and wires made of steel or stainless steel
(A fastening by threads is also possible.)

Our employees are our greatest resource

As a manufactory we depend on the qualification of our employees more than other enterprises. Our employees are selected, qualified employees, who already have a long-standing experience in the processing of glass fabrics, insulating materials and their equipment. This also leads to the solution of unconventional tasks and therefore contributes to the competitiveness of the customer. A long-standing relationship between BTG Kiel and our employees is one of our main strengths.

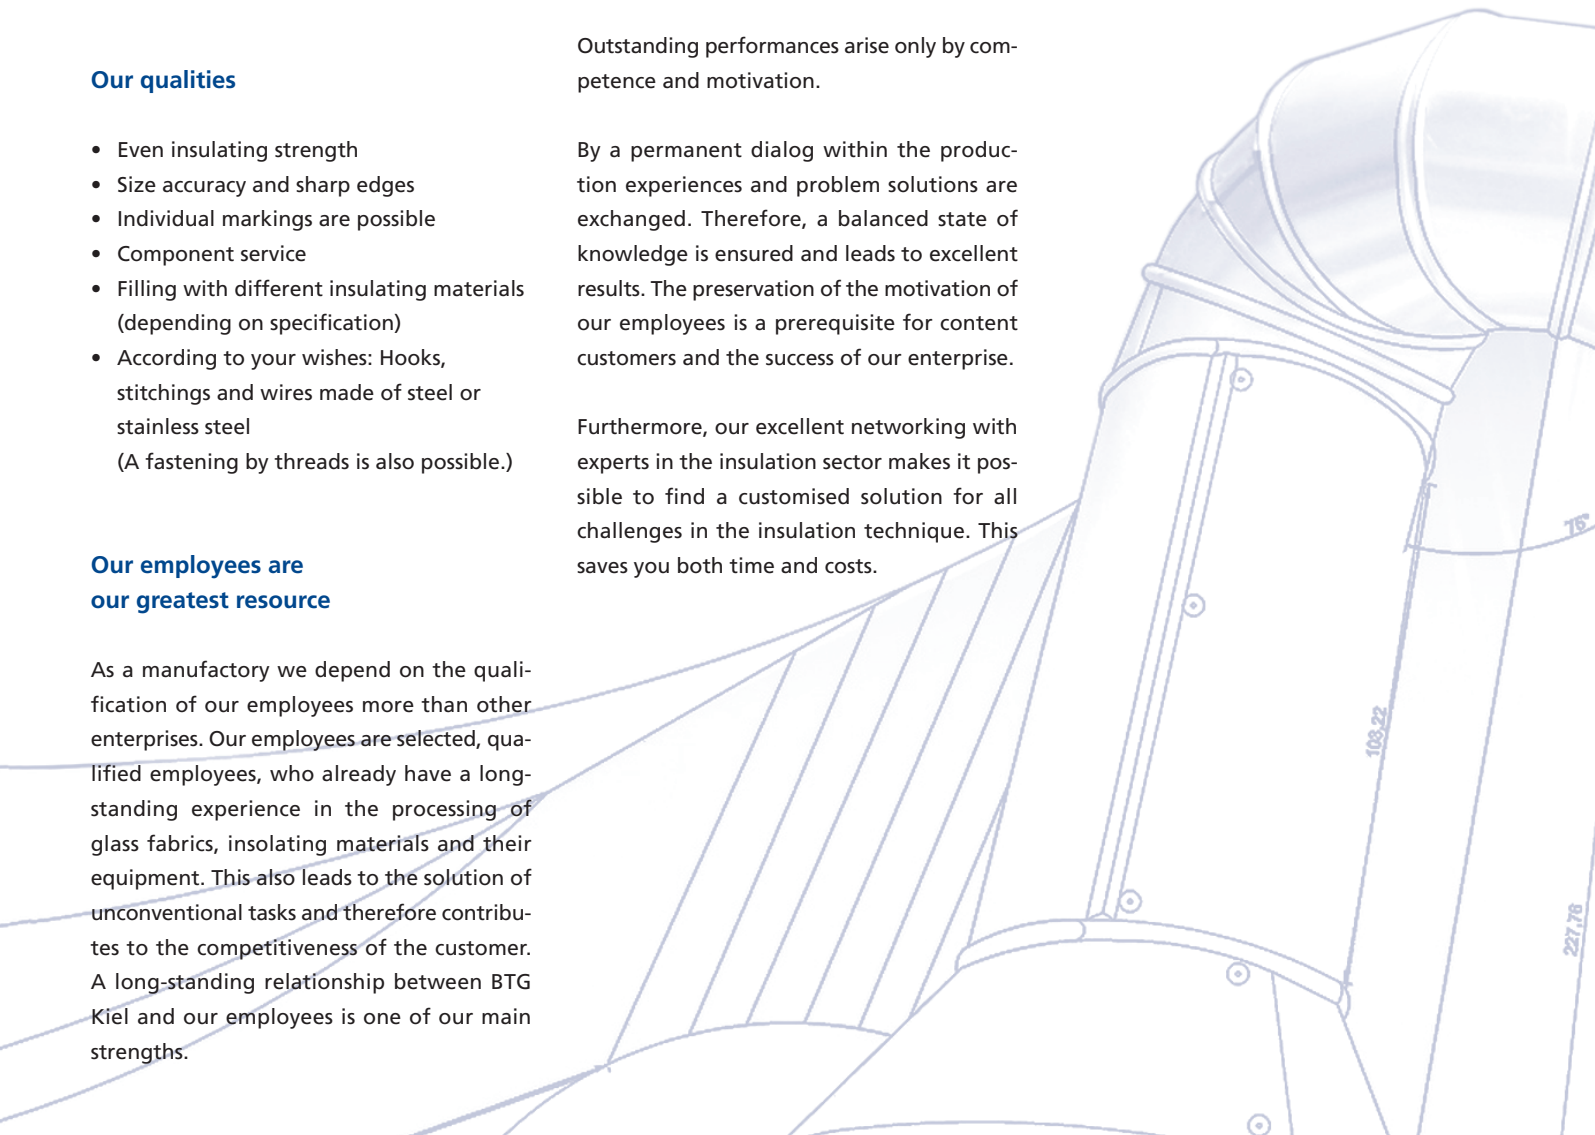

Competence, skilled craftsmanship –
employees of BTG

Outstanding performances arise only by competence and motivation.

By a permanent dialog within the production experiences and problem solutions are exchanged. Therefore, a balanced state of knowledge is ensured and leads to excellent results. The preservation of the motivation of our employees is a prerequisite for content customers and the success of our enterprise.

Furthermore, our excellent networking with experts in the insulation sector makes it possible to find a customised solution for all challenges in the insulation technique. This saves you both time and costs.

A customised solution for everyone

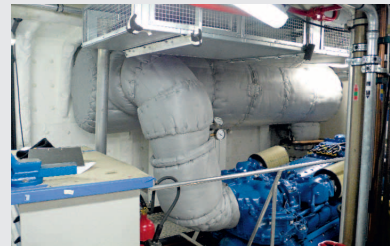

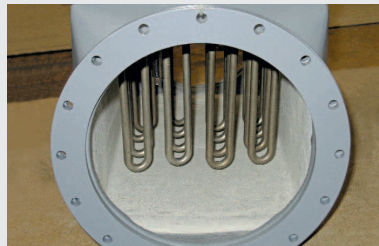

We are your expert in the maritime sector with solutions for drive technology and operating technology.

We also proof our competence in the field of stationary mechanical engineering and plant construction.

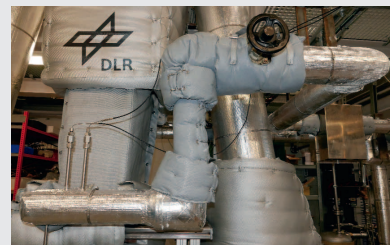

© thyssenkrupp Marine Systems

We find successful solutions even for individual tasks, for example for Thyssen Krupp Marine Systems.

© Wolf-Dieter Gericke, Waiblingen

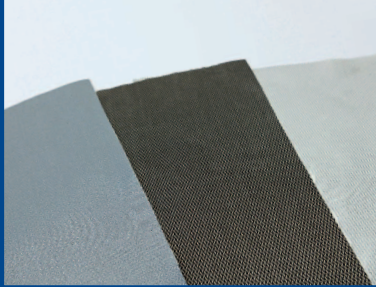

We contribute to the success of research institutes such as the DLR Stuttgart.

We have innovative solutions also for the equipment of railway or road vehicles.

Our diversity – your solution

Standard fibres with silicone or PU cover

Resistant to dust and liquids

Certified materials according to IMO

Individual equipment with different assembly and locking systems

Available materials on request

High temperature fibres for all hot plant sections and machine parts

Fibre with temperature resistance up to 1200 °C available

Certified materials according to IMO

Special customised constructions for individual application areas and requirements

Special fibres with resistance against chemicals and fluids

Construction of customised insulation batts and design implementation as supply for assembly lines

Filling with rock wool for general applications

Certified materials according to IMO

Filling with silicate batts for specific high-temperature application

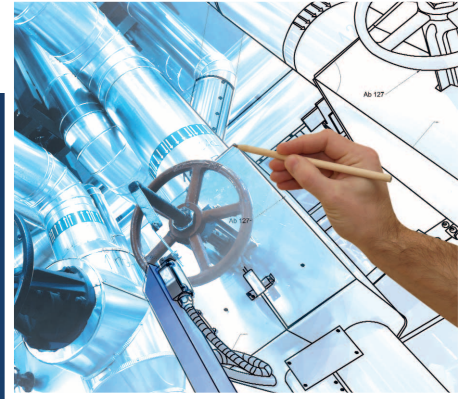

Other fillings are possible on request

Innovative materials for environmental standards

More information on request

Rely on our service

Our service

- Record of detailed measurement
- Technical support by certificates and data sheets
- Individual solutions for our products
- Relaying and involving of special companies

Whether casing of pipes, manufacturing of oversize tool or storage bags – we are always there for you, when you need us.

Have we arisen your interest or do you have questions on the insulation technique?
We are looking forward to supporting you by our individual consultation.
